## Powerful Key ingredients with multipurpose properties

Key ingredients	Description
<b>Vegetable alternative to silicone 5+5%</b>	Plantsil is our alternative to silicone. The vegetable-based softening oil derived from olives has excellent spreadability. Its silky texture has a long-lasting, satin-soft effect on skin.
<b>Argan Oil 2%</b>	Containing essential fatty acids important to the prevention of early signs of aging and loss of elasticity, nourishing argan oil with tocopherols has excellent skin protective, softening and anti-drying properties.
<b>Baobab Oil 2%</b>	Protects the skin against damage from free inflammation while nourishing, softening and promoting wound healing.
<b>Fensebiome™ Amino Acid Peptide 1%</b>	A powerful peptide with a prebiotic approach and probiotic effect. Stimulates the skin's natural probiotic activity, boosting its defenses by favouring beneficial bacteria that improve skin immune response and physical barrier integrity. The unique microbiome-stimulating active helps to rebalance skin health for optimal wellbeing.
<b>Amino Acids 1%</b>	A highly effective AHA (Alpha Hydroxy Acids) moisturiser formulated with NMF (Natural Moisturising Factor), amino acids play an important role in maintaining the skin's moisture levels. Aiding cell renewal, this active ingredient has a prebiotic stimulating effect to support the skin's natural microbiota.
<b>Natural Extracts from Chicory Roots 1%</b>	Pre- and probiotic skin microbiome-friendly extracts derived from the root of the chicory plant. A strong stimulant with a prebiotic approach and probiotic effect, it supports the growth of lactobacilli and blocks the invasion of e.g. fungi, boosting the anti-microbial effect and strengthening the skin's microbiota barrier.
